- **TEtno-Pepit@s - La Tecnología en la Construcción del Pensamiento Computacional** – Colombia

About Acknowledgments

As a result of this activity, an interactive map will be prepared and hosted on a web page of the OAS Educational Portal as a repository open to the general public. Soon we will be sharing the link so that you can consult it and spread it among your networks.

Likewise, a report will be prepared with a systematization on all the good practices presented that meet the selection criteria, seeking to publicize the type of initiatives developed.

About participating in the EnlightED 2022 event

The Schools and CSOs whose applications have been selected to choose a teacher to represent them at the EnlightED 2022 event in Madrid, have already been contacted directly by the Mapping organizing committee. Soon they will be announced on our official channels.

Once again, we appreciate your support in the dissemination that was given from the Permanent Missions to this activity and we are aware of any questions or comments.

Have a nice day!
