#HomicideReport

- Latin America and the Caribbean (LAC) has one of the highest homicides rates globally. However, violence, victims and aggressors present specific characteristics that must be understood to address the different challenges they impose to governments, private sector and society.
- The Global Study on Homicides 2023 analyzes and provides insights about the:
 1. Trends and patterns of intentional homicides along LAC.
 2. Populations at risk.
 3. Criminal justice responses, and the
 4. Relation and impacts of global megatrends like population ageing, economic inequality and climate change with homicides.
- Furthermore, the presentation will include a section on how organized crime is driving homicides trends in LAC.
